

## 9555 Handset

The Pivotel Iridium 9555 handset gives you the freedom to have a mobile phone where normal mobile phones don't work. Unlike land based networks, the handset is simply operated by ensuring you have a clear view of the sky and the satellites above. Deploy the retractable antenna, dial the number, and press call.

Send and receive SMS, access your voicemail, store numbers in the phonebook and customise your phone settings, just as if you were using a standard mobile phone.

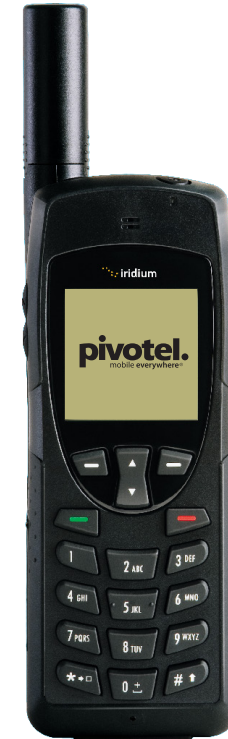

## Why Pivotel?

As Australia's leading Mobile Satellite Service Provider, and a licensed mobile network operator, only Pivotel's Iridium service provides:

- Standard 04XX mobile phone numbers
- Low satellite call rates.
- Familiar dialling for outgoing calls in Australia
- Callers to you pay standard call-to-mobile rates
- A dedicated team of customer care specialists based in Australia

Terms and conditions. Reception limitations and some exclusion zones apply. A clear view of the sky is required for operation in satellite mode. Australian coverage includes all island territories with exception of Antarctica.

## Handsfree Vehicle Kit

The Pivotal Iridium 9555 Car kit (sold separately) comes with a fully integrated cradle with power and audio coming through the cradle base. The carkit is designed for voice and data communication and is ideal for vehicles, boats and aircraft.

The cradle is used to connect all the peripherals through the base connector of the phone including the external magnetic patch antenna and DC power source.

### Includes:

- Handsfree microphone
- Handsfree speaker
- 9555 docking cradle with base connectors
- Electronics module
- Connection cables
- Mini magnetic patch antenna

### Also available

- Optional noise reducing privacy handset
- Optional high gain whip (Bull Bar) antenna
- Optional aerodynamic tail fin antenna

## Desktop Dock

The Desktop Dock is ideal for Remote Command Centres and Portable Site Offices which require Satellite Services inside buildings and a portability option (Sold separately).

## Accessories

A range of accessories is available to help maximise the flexibility of your Satellite Phone.

Permanent and portable vehicle kits allow you to use the phone while on the move and desktop docks allow you to use your phone inside. There are cases to help protect your Satellite Phone as well as many other accessories.

### Personal handsfree earpiece

This handy retractable earpiece is excellent for people on the move. It plugs straight into the Iridium 9555 handset making it easier to make and receive calls (Included).

### Car charger

The charger is designed for use in standard 12v DC accessory sockets fitted in vehicles and plugs directly into and charges the Iridium 9555 handset (Included).

### High Capacity Li-ion Battery

The long life rechargeable battery is designed for use in the Pivotal Iridium 9555 handset, and is suitable to carry as a second spare battery or a replacement (Sold separately).
